AVI-SPL designs, builds, integrates, manages, and supports the AV systems and video collaboration solutions that improve the way your organization works.
AVI-SPL is the most trusted provider of AV and video collaboration solutions for organizations of all types, all around the world.

We earn that trust through diligence in everything we do:

- Understanding your needs, to planning, building and implementing solutions that meet those needs,
- To supporting your company with reliable tech support and managed services.

avispl.com
AVI-SPL: Ranked the number one systems integrator in North America by *Systems Contractor News* since 2006

What Sets Us Apart

- Our ability to scale solutions and services to any organization’s need.
- More certified technical staff than any other systems integrator.
- The ability to self-certify technical staff to InfoComm standards.
- First multi-national integrator to be InfoComm APEx certified, our industry’s highest level of recognition.
- Global delivery and partnerships with the leading technology providers.
Video Collaboration
Video conferencing has merged desktops, personal devices, and meeting spaces into a fluid collaborative experience.

- Room design standards, implementation, ongoing support
- Hosted infrastructure and gateway services
- On-premise, cloud, or hybrid solutions
- Top-level certifications with Cisco, Microsoft, Polycom, others

Digital Media & Signage
Digital media engages customers and guests in exciting ways: 2D and 3D wayfinding, traditional and interactive signage, customized experiences delivered to the mobile phone.

- Strategic assessments and digital media system plans
- Content design, hosting, delivery and management

High-Tech Meeting Spaces
The meeting space should be the hub of innovation and transformation for your company.

- Open collaboration areas, huddle rooms and team meeting spaces
- Automated room controls
- Conferencing, wireless content sharing, interactive displays, audio design

AV Systems Control & Management
Connect your AV and video collaboration devices to one another and your network so they seamlessly work together and can be monitored and managed remotely.

- Meeting room scheduling with MS Exchange
- Proactive monitoring of AV systems
- Insight into device and room usage analytics
Large Venues & Auditoriums
Large-scale and engineering-intensive AV integration projects require the solid relationships we’ve built with architects, contractors, and consultants in high-profile venues.

- Advanced acoustic design
- Large-scale video walls and digital media
- Networked audio and IPTV
- Live broadcast systems

Sound Systems
The distribution and reinforcement of audio applies to environments ranging in size from huddle rooms to stadiums.

- Acoustic design
- Networked audio
- Programmed sound (including noise filters)
- Audio echo cancellation

Studio & Broadcast
Our specialized practice applies to in-house corporate studios as well as to dedicated broadcast facilities.

- Migration to IP, SDI/IP hybrid workflows
- 4K live and post production
- Flexible monitoring layouts, including 4K, modular, and IP

Advanced Visualization
See complex data in a new light and change the way you research and innovate. High-resolution 3D projection combines with virtual worlds to create immersive environments.

- High-definition, remote exploration
- Training simulations
- Large-scale data visualization

Command & Control Centers
Our Control Room Group’s customized, whole-room approach is led by certified technicians and designers who are among the industry’s leaders.

- ReadyCam, the in-house studio system
- Network operations centers
- Military situation rooms
- Traffic control centers
- Emergency operations centers

Product Sales

Professional Services
We take the time to understand the way your organization works and recommend a system design and solutions to benefit your teams. Led by PMP- and industry-certified engineers.

- Collaboration program design
- System engineering
- Implementation services
- Training and adoption

Support & Field Services
Because we’re a certified service provider for all major manufacturers we offer, our Customer Care service ensures the reliability of your AV systems and minimizes downtime.

- Three 24/7 Global Help Desks
- Warranty services
- Preventative maintenance
- Break/fix support

Managed Services
A positive end-user experience depends on behind-the-scenes support. Using our Unify ME Symphony platform, dedicated technicians work around the clock to monitor and manage the AV and video collaboration devices on your network.

- Proactive issue resolution
- Resource scheduling and video conference production
- Hosted infrastructure and gateway services
- Customer dashboard for scheduling, monitoring, and reporting
University of Toledo IISC

The University of Toledo’s Interprofessional Immersive Simulation Center uses advanced visualization systems integrated by AVI-SPL to train healthcare professionals and students. We also integrated video collaboration, digital signage, IPTV, and other AV devices into an intelligent system where technology areas can talk to one another.
Boeing Collaboration Center

The Boeing Collaboration Center engages guests with interactive technology that helps them explore and learn about Boeing’s latest advances in aerospace. That interaction gives Boeing insight to develop new solutions its customers require. AVI-SPL provided interactive video walls, video conferencing systems, multi-touch tables, and Crestron control systems that empower staff to manage different zones and curate display content.

Zurich Insurance Group

The new headquarters for Zurich North America has the collaboration technology that makes it a place where people want to work. Simple, reliable, and intuitive are the guiding features of the solutions Zurich wanted and AVI-SPL deployed.
