

Meet anywhere. Capture anything. Simplify everything.

Portable Interactive UHD Digital Flipchart

Game-changing ideas can get lost in the shuffle to find or prepare a room. The Samsung Flip simplifies and fast tracks everything. The portable, interactive UHD digital flipchart drives more productive and efficient collaboration without the hassle of complicated set-ups. Meetings can take place anywhere, any time and on time. With the Samsung Flip, everything you need will always be ready to go.

Key Features

Easy to Set Up, Easy to Learn, Easy to Train

The Flip takes only minutes to set up, and its tablet-style user interface is intuitive. Just tap, scroll and navigate. Portability makes any space a meeting room. Sensors activate the Flip automatically, while 4K UHD and landscape and portrait modes add engagement. And Knox™ begins protecting data the moment the Flip is powered on.

Meetings Start on Time

Skip the lengthy boot-up. Embedded sensors activate Flip as you approach, remove the pen from the holder or rotate the display.

Seamless Collaboration

You can capture, annotate and share seamlessly with wireless or wired connectivity. You can also connect, view and manage the Samsung Flip from a mobile device. And up to four people can write simultaneously, enhancing collaboration further.

Share on the Big Screen for Everyone to See

You can wirelessly mirror everything you're doing on the Flip to another screen in the room. Everyone can have a front-row view.

Write and Draw

Premium Multi-Touch Collaboration makes writing smooth and fast, with a pen-and-paper feel. And meeting participants can use virtually any writing tool, such as the blunt end of a pen.

Save and Instantly Share Meeting Notes

All your notes are automatically saved as you work, so you don't have to wait to save each page. And after the meeting, it's easy to instantly share those notes via email (now with LDAP support), network, printer or by saving them to a USB drive.

Safe and Secure

Secure meeting notes and keep them confidential by locking the display or a specific note with a unique PIN. Additionally, the Flip supports Enterprise WPA2 for secure wireless connectivity.
